

### Protected Hoses

All of the hoses are routed through the durable backhoe arm for a streamlined design and enhanced protection.

### Incredible Digging Power

The BH64 offers an impressive digging depth of 6.7 feet and boasts more than 2,500 pound of bucket breakout force.

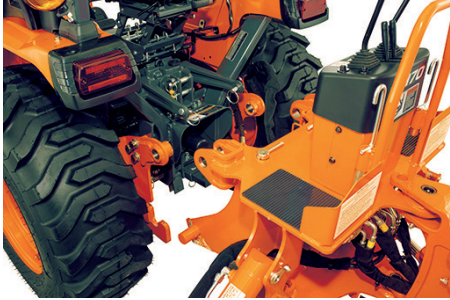

### Reversible Seat

The B2320 tractors feature a new reversible seat, which is standard-equipped with BH65 backhoe. This convenient seat swivels from front to back and saves space, improves comfort, and makes backhoe operation more efficient.

### Mechanical Thumb (Optional)

Kubota's BH65 is also available with an optional 6-position thumb, for expanded capabilities and efficient material handling.

### 4-point Quick-attach System

With its pin-and-hook type quick-attach system, the backhoe can be attached in minutes-without tools. And, with four connecting points for structural integrity, tractor balance is improved.

### Large Operator Platform

Thanks to the new reversible seat and a compact lever link cover, the tractor offers a spacious platform area for comfortable backhoe operation. And, since the backhoe connects closer to the tractor, overall balance is enhanced.
